I. READING COMPREHENSION

(8 marks)

Read the text and answer the questions.

A- THE TEXT

1) Youssef, the boy working with the consultant Salwa, told UNICEF, "I left school three years ago. I didn't like school. I didn't feel convinced that they were really trying to teach me anything. So I tried to work as a mechanic. But **that** wasn't good work either. Then my mother told me about the Second Chance Center, and I liked the idea."

2) "When I first came **here**, I still didn't really feel like studying. I wanted to go straight into cookery training, but the consultants convinced me that I needed to complete two more years of study, and get my high school diploma. And then I could move into cookery study."

3) While shy, Youssef smiled broadly when asked how he's feeling after working with the consultants like Salwa. "When I come to the center, I feel that there's someone looking out for me and my future. I feel that now I can reach where I want to go; to be a chef in a nice restaurant or hotel."

Technical education refers to engineering, medical, agricultural, and industrial studies. Technical education creates more and more **(employer - employment - employee)** opportunities. If someone gets **(educated - educating - educate)** in this field, he can work with a company or individually without **(have - to have - having)** to worry about finding a job. After completing an engineering or medical course, there is none **(whose - which - who)** is jobless. There are lots of enthusiastic people, who love entrepreneurship and want to do something on their own.
